“ In 2017, I interviewed Marilyn Barnes Robertz, who had been a patient at Ah gwah ching sanatorium as well as a classmate of Betty at Gustavus. Here is what Marilyn said about Betty: " I think she tried to cure at home for a while, and then she came up to the sanatorium. It was either just at the end of my stay or after I left. Then she came back to St. Peter and graduated from Gustavus in 1949. I graduated in '51. We connected because of our having had TB. She was the most delightful, bouncy person. Everything she said turned out funny. You could laugh with her all the time. She had just a free spirit. She looked at everything with a different eye. She's a very sensitive soul. Her poetry is great for a woman to read because they are all about things in the family."

Marilyn passed away in 2020, age 93.

--Mary Krugerud

The Girl in Building C is a collection of Marilyn's letters written while at Ah Gwah Ching.
