“ We miss you George. We never understood your French but did enjoy your many jokes and puns. You and Flossy produced three wonderful kids and of course, those two exceptional grandchildren. Sallie, Flossy and you are even related back about seven or eight generations with two common grandparents. Ray and I send our deepest sympathies to your many family members and friends.

“ I remember when he was in high school and George built an oscilloscope from a kit. The first of many such projects. Ellen
