“ I just recently heard of John's death. Even though we were only acquaintances in high school, I remember driving around in his VW beetle listening to Prince. So young and so smart. He had a piercing wit to him. I'm sorry your life was cut short living full in your mind and that is what matters. Bye, man.

“ I lived next to John in Minneapolis for several years. I was impressed by his unique view and enjoyed getting to know the truly good heart he had. I cannot fully express my sorrow for his parents. I miss him, his friendship meant a lot to me.
