“ I worked with Kathy for many years at the University of Minnesota. I treasure the memory of my very first day on the job when I first met her and she went out of her way to make me feel welcomed and included. Another memory that sticks out is how she had her answering machine message set up to say, “Bertha and I can’t get to the phone right now - so if you will please leave a message - we will get back to you as soon as possible.” (Bertha was her cat.) Although I am not able to attend her service - I will be making a donation in Kathy’s name to the Animal Humane Society.
