

Leonard A. Lundquist

August 15, 1936 - November 24, 2016

Age 80, died very peacefully this Thanksgiving evening, surrounded with love by his family. He was a gentle, gracious, and intelligent man, husband, father, grandfather, and colleague. He is already missed. He leaves behind his wife and companion of 59 years, Dorothy, whom he met and started to date at age 17; his four children (Lenny, Dan, Mark, Karen) and nine grandchildren. He leaves behind as well many co-workers and business friends. Per John Killeen, "For those of you who didn't know Len he founded Lundquist Associates in 1969 which eventually became LKPB Engineers. Len was known for his excellent mechanical engineering skills, as a keen businessman, a tough negotiator and a strong dedication to his clients...I considered Len the hardest working person I had ever met."

“ *I am so saddened to hear of Len's passing, for I know how loved he was by his family members. It is never easy to lose a father or grandfather, so I hope Dan, MaryKate, Isabella, and Gabrielle will be comforted by many wonderful memories of their visits to Minnesota and Len's happy times in their home in NJ.*
