Margaret (also "Angie" or "Happy") was a simply marvelous lady. A generous and devoted mother and grandmother and a great friend to many. She was curious, intelligent, and fiercely independent; loved ballet, jazz, and dancing to any music with a beat; could solve any problem with her cleverness and "Me Do!" determination. Margaret grew up in Kansas City, graduated from junior college during WWII and loved her meteorology and hospital work. She married Dr. William Jepson and became an amazing homemaker, hostess, and mother of four, while studying at the UofM and working for womens rights. After divorcing, she became a top Xerox salesrep, traveled to China, Greece& Europe; was a self-taught expert in personal finance; and honed her talents in painting and gardening. Angie kept her charm and dignity through the long decline of Alzheimers' disease. We thank the big-hearted staff at Sunrise of Minnetonka for their loving care, especially for appreciating Angie's sense of humor.
