“ Thank you Mrs. Henke for making math enjoyable! I have fond memories of my time on the Math Team back at Central. Even though that was in the mid to late 80's, I look back and get a smile on my face when I think of you and the fun times we had together. Thank you for being an inspiration to me and many others!

“ Thank you Marlys for being a friend through the years, for being part of the team that created that junior high math league and for taking on and developing its legacy. Thank you for introducing me to the miracle of hands on healing and helping me grow in that field as well. Your generosity of spirit and love of everyone you met will long be remembered.
