“ Pat I will miss you

We worked together,we shared, and we laughed.How I wish we had that last lunch or another nine holes to play. That last conversation where I could learn so much.

You never stopped growing and the changes you made were an inspiration to all who new you.

I remember the time we were calling on 3M you carrying the rotary hammers me carrying the concrete block, it was hot and all we had was stairs no elevators, and when we reached the fourth floor, You turned and said "are you with me or am I with you" and I said "what do you mean" and than you said "because if your with me I don't need you."

I MISS YOU.....

your friend Jim
