Ralph's first career was as a manager for IDS. During his IDS days, he and his dad started acquiring residential rental properties and turned it into a thriving, three-generation business. One of his many legacies will be the people in his life whom he mentored in the business of owning and managing rental properties. In 2007, Ralph was diagnosed with Mild Cognitive Impairment that led to Alzheimer's disease. True to his personality, he was a happy and active person for many years of his diagnosis. Those who cared for him loved being with him and being the recipients of his constant "thank you" and big, wonderful smile.
